### **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/671,296 filed September 25, 2003.

#### ***Specification***

The disclosure is objected to because of the following informalities: In line 19 of page 4, there appears to be a few words missing. The words "...when the parking brake of the vehicle" is unclear.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-7, 9-12, 14, 15, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Perry (4,381,042). Perry discloses a method of reducing vehicle idle time, comprising the steps of detecting whether there is an occupant in the vehicle (15), and disabling a timer (16) that generates a signal to shut off an engine of the vehicle if an occupant is detected in the vehicle.

Regarding claims 4-6, an override circuitry.

Regarding claim 7, 12 and 15, wherein override circuitry comprises a switch (94).

***Allowable Subject Matter***

Claims 3, 8, 13 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 5,219,413 issued to Lineberger is a similar system with a motion detector. U.S. Patent No. 3,500,946 issued to Boyajian is a similar system.
